

### **Why did you choose the T level route?**

It meant I was able to study something I am passionate about all the time. Instead of one subject I am interested in and two others I am not that interested in. It also gives me the opportunity to gain some experience in the workplace.

### **What T level course are you completing?**

Digital Production, design and development T-Level.

### **What do you enjoy most about your course?**

Overall, I enjoy the whole course but if I had to pick one thing, I like more than all the other modules, it would have to be the coding side of the course.

### **What are you enjoying most about your placement with Savient?**

So far, I am enjoying everything about the placement, but my favourite part must be the workshops Savient run. I like to learn new things and these workshops allow me to learn in a fun way with people who have years of experience in that area.

### **What benefits does the placement opportunity provide to you?**

Having a placement as part of my course has really helped me develop my skills further with people who have knowledge/experience in the industry. In addition, the placement opportunity allows you to connect with people who are in the same industry that you are looking to work in potentially opening doors to opportunities I might not have encountered otherwise.

### **What have you learnt?**

With Savient I have learnt more about the way a company works along with all the software and tools they use such as confluence and Jira. In addition I have attended many workshops that have allowed me to gain/expand my knowledge in many different areas. From learning a new language and GIT to AWS fundamentals.

### **What are you planning to do after you complete your T level course?**

Go on to an apprenticeship.

### **What advice would you give to someone who is considering doing a T level placement?**

If you are interested and most importantly enjoy one area and would like to gain industry knowledge before you go into work, then a T-Level is a fantastic opportunity for that. If you are not sure what you want to do as a job / after college then A-levels allow you to try lots of different things and will be a better option to help you find what you enjoy.
